

## Food Service Notice Concerning Prepayments MyLunchMoney.com

The food service department uses a computerized point of sale program which enables parents to prepay for meals. At lunch time, students scan their ID to deduct the food cost from their prepaid balance. Similar to a debit card, the system will not accept charges or negative balances. Parents can create an account at [www.mylunchmoney.com](http://www.mylunchmoney.com) or send a payment to the school. An account will be established for your child the same day and can be used the same day if received before the lunch period. Creating an account through mylunchmoney.com provides parents with exciting features such as viewing student purchases and spending history, low balance email notifications, the ability to set daily/weekly spending limits for your child and the capability to set your child up for meals only or a-la-carte.

Money remaining in a students account at the end of the year will remain in the account to be used the following school year. If requested in writing by a parent, account balances for graduating students or students moving out of the district can be transferred to other family members or if more than \$10.00, refunded at the end of the school year. All refunds must be requested in writing by parents and will be refunded by check. No cash refunds will be issued. Students should spend balances of less than \$10.00 since no refund will be issued for this amount.
