Dear Parents and Guardians,

Your child is currently enrolled to take AP Calculus this fall. Please be advised that this course has a summer assignment. The assignment consists of the topics to help prepare a student for AP Calculus. The assignment is to be submitted to Mrs. Green during the first week of school next year. We have attached them for your convenience. We added the supply list to this attachment so that students may be prepared for the start of the year.

These topics were covered in prerequisite courses. If your child is finding the material difficult, (s)he may try watching a YouTube video over the summer in order to be better prepared.

Some students may be considering the Dual Credit option discussed with them by their counselor during the registration process. Students may take the ALEKS placement test to determine whether they qualify for this option. There is NO charge for the test, and it can be taken at JJC's Academic Skills Center in the A-building of the Main Campus throughout the summer Monday through Thursday 8 a.m. to 7:30 p.m. The placement test must be completed prior to the start of classes in August. Seniors may qualify for Math 170 credit if his or hers ALEKS math assessment score is between the range of 76-100. Students coming in with strong A/B averages from the Pre-Calculus Trig Honors course are typically good candidates for the Dual Credit option, as well as the AP credit.

We hope you find this information useful in helping your child be successful!

Best regards,
Mrs. Sandra Green
AP Calculus Instructor
Joliet Central Mathematics Teacher/Instructional Coach
Joliet Junior College Dual Credit Instructor
