

JTHS Summer Instructional Program

Program Focus

- Improve academic skills in the areas of reading, math, and writing in an engaging environment infused with SEL, vocational, and team building activities
- Identify learning gaps that may have been attributed to or inflated by remote learning
- Provide opportunities for credit recovery and enrichment

Program Details:

June 7th-July 1st

Monday-Thursday

8:00 am -1:00 pm

Students currently
in grade 9-12 should
enroll

Students that participate in the program will:

- Take a non-credit JJC class that will give them post secondary experiences
- Receive social emotional instruction and supports
- Explore vocational skills and obtain vocational experiences
- Have an opportunity to receive an paid summer internship (If your student is 17 or 18 years old)

After participating in this program, students will:

- Develop techniques for overcoming learning (academic) challenges
- Discover strengths, exercise creativity, and prepare for the school year ahead
- Receive academic instruction in an innovative, creative, and fun way that exposes students to academy classes and curriculum in the areas of math, reading, and writing
- Engage in opportunities for vocational exploration and experiences
- Become equipped with SEL and leadership supports and services that will enhance engagement in the academic environment
- Increase technological comprehension to successfully access the academic environment and to attain skills that will allow for independent participation in the global community
- Increase self confidence and awareness
